

Non Contact Web Cleaner

BR43

Improved Quality

– With Kelva's BR43 for Effective Narrow Web Cleaning

- Cleans both sides of the web simultaneously
- Effective 3-chamber solution
- No contact damages on the web
- Low maintenance, no wear on components
- Single sided connection

Kelva's web cleaner head BR43 is used for continuous narrow webs having widths up to 450 mm. The head is opened manually to facilitate the threading of the web. The web cleaner head works with both vacuum and pressure and cleans both sides of the web simultaneously.
